PROFESSIONAL SUMMARY

Cybersecurity-focused engineering student with hands-on internship experience building a password strength analyzer, mini vulnerability scanner, secure login system, and phishing email detector. Knowledge of secure authentication, vulnerability scanning, and online privacy. Seeking an entry-level cybersecurity or security analyst role.

EDUCATION

R.M.K. College of Engineering and Technology (RMKCET)

TECHNICAL SKILLS

- **Cybersecurity:** Vulnerability Scanning, Secure Authentication, Password Security Analysis, Phishing Detection, Online Privacy and Social Media Security
- **Programming & Scripting:** Python, Java, SQL
- **Core Concepts:** Data Structures & Algorithms, Database Management Systems (DBMS), Internet of Things (IoT) Basics
- **Tools:** Git, GitHub

INTERNSHIP EXPERIENCE

Cybersecurity Intern – Thiranex (Online) | 1 Month

- Built a **Mini Vulnerability Scanner** to identify common security weaknesses and report findings.
- Developed a **Password Strength Analyzer** that evaluates passwords against security criteria and gives improvement feedback.
- Implemented a **Secure Login System** using secure authentication practices.
- Created a **Phishing Email Detection** tool to identify suspicious emails using keyword and link indicators.

PROJECTS

Mini Vulnerability Scanner – Scans for basic security issues and reports findings in a readable format.

Phishing Email Detection – Flags suspicious emails using keyword and link-based indicators.

Secure Login System – User registration and login with secure password handling.

Password Strength Analyzer – Checks length, character variety, and common-pattern weaknesses and reports a strength rating.
